WORK HISTORY

Full Stack Developer | UC Berkeley Extension Coding Bootcamp - Berkeley, CA   03/2020 - 09/2020

- Developed several full stack web applications using technologies such as Javascript, Node.js, Express, MySQL, MongoDB, React, CSS, and other frameworks and libraries.
- Learned new technologies on the fly, utilizing information technology background for efficient troubleshooting.
- Used Slack and Github to coordinate version control, issues, and workflow with other developers on larger projects.

Systems Support Engineer | ATI Connect - Emeryville, CA   08/2017 - CURRENT

- Performed root cause analysis and general troubleshooting on various systems and services across several technologies, including networking, VoIP, Mitel and legacy ShoreTel onsite PBXs, and ATI's various custom applications.
- Helped streamline repair processes and update procedures for support action consistency, keeping quality documentation.
- Effectively communicated with other system engineering personnel and senior executives on joint projects.
- Conducted QA on in-house applications as well as outside integrations.
- Hosted product demos and training sessions for audiences as large as 350.

Junior Marketing Associate | ATI Connect - Emeryville, CA   10/2016 - 07/2017

- Assisted in the creation and execution of a variety of marketing campaigns.
- Conducted research and presented findings regarding potential tools to use for enhancing marketing reach and effectiveness.
- Examined market and identified segments for research and potential opportunities going forward.
- Wrote engaging and successful marketing, advertising and website copy.
